

## Surface Refinement for Fittings Made of Zinc Diecast

Technical information for customers

### GG-Pro black (Article no.: 960)

<b>Properties</b>	<b>Applications</b>
<p><b>GG-Pro 960</b> is a zinc layer (acidic or alkaline) on zinc diecast items galvanically separated in the barrel.</p> <p><b>GG-Pro 960</b> has a CrVI-free layer or thin layer passivation. Besides, an inorganic sealing is fitted as a top coat.</p> <p>Depending on the demands made on corrosion resistance, <b>GG-Pro 960</b> can be varied in layer thickness.</p> <p><b>GG-Pro 960</b> features a temporally stable and constant chromatic formation.</p>	<p><b>GG-Pro 960</b> is especially suited for those applications in which a combination of both corrosion and scratch resistant and CrVI-free surface is required.</p> <p><b>Economic Aspects</b></p> <p><b>GG-Pro 960</b> is a cost-beneficial surface and offers, due to its corrosion resistance in combination with its freedom from CrVI, an optimum price-performance ratio for the coating of steel and furniture fittings. Depending on design, the coated parts can be used both, indoor and outdoor.</p>

### Features:

**ISO 9227 / DIN 50021 salt spray testing corrosion resistance** >24h (white rust)

**Appearance** black

**Surface and coatingprocess are Cr-VI free!**
